Tailored Technical Solutions

APR consultants have designed, developed, and deployed a broad range of customized technical solutions for a wide breadth of clients. Our goal is to develop solutions that effectively manage multifaceted operations, thus improving overall performance and to exceed your organization's expectations. Our team of experts will collaborate directly with your team to identify the approach and develop the solution that best fits the unique business needs of your organization.

- Workflow/Process definition refinement
- COTS setup and configuration
- Data conversion and integration
- Developing add-ins, macros, and scripts
- Custom tool and middleware development
- Eliciting and interpreting business needs
- Leading discovery/requirements
- Gathering Sessions
- Translating and conveying business needs into technical solutions
- Documenting business requirements and specifications
- Prototyping, developing, and deploying

Differentiators:

Integrated constructibility, value engineering, and risk analysis within estimating process. Over 1,000 assignments and \$1 trillion in construction value. Reasonable accuracy, reliable, and reconcilable.
